

With total Industry 4.0 alignment, **INCLUDIS Automation Systems Inc.** develops and sells web-based Manufacturing Execution Systems (MES) and IoT solutions for real-time production monitoring in the manufacturing industry. We support the digital transformation to the Smart Factory with creative ideas.

The performance capacity of our software house grows with each customer requirement. To solve these problems we are looking for committed employees with energy and know-how – and this includes individuals entering the job market.

Achieve new goals together with us in the IoT world and cloud computing.

To strengthen our IT team in our offices in Europarc Dreilinden directly adjacent to Berlin-Wannsee, we are currently looking for a
Software developer .Net/C#

Your tasks:

- Software development and MES web applications
- Execution of installations and software updates
- System consulting and training of our customers

Your profile:

- University degree in engineering or computer science
- Preferably professional experience in software development
- Web development skills .Net, C# and Visual Studio
- SQL database skills (Microsoft-SQL-Server)
- Team spirit, flexibility and high-level quality-consciousness
- Strong communication skills in interaction with customers
- Perfect German and fluent in English

Our offering:

- Friendly work atmosphere with flat hierarchies
- Flexible work times and performance-oriented salary
- Varied projects with direct customer contact
- State-of-the-art technologies and coaching
- Internationality through worldwide customers
